

LETTER OF RECOMMENDATION

13th January 2026

TO WHOM SO EVER IT MAY CONCERN

I am pleased to recommend Mr. Dhruv Jyoti Das for a research internship opportunity. I have known Dhruv for the past three years in my capacity as his Faculty Advisor in the Department of Computer Science and Engineering at SRM Institute of Science and Technology. Over this period, I have taught him courses such as Data Structures and Algorithms (DSA) and Design and Analysis of Algorithms (DAA), along with corresponding laboratory components.

Through my interactions with Dhruv, I have observed him develop strong academic foundations, disciplined technical thinking, and a clear enthusiasm for research-oriented work. He has consistently displayed a strong grasp of algorithmic principles, data structures, time and space complexities, computational problem-solving, and their practical implementations. In laboratory sessions, he demonstrated both analytical precision and implementation maturity, often going beyond baseline requirements to optimize and validate his solutions.

In my role as his faculty advisor, I have also guided Dhruv in understanding research as a structured and rigorous activity. Dhruv has shown an early maturity in this respect—he actively discusses research papers, understands the importance of problem formulation, experimental design, reproducibility, and scholarly communication. His curiosity, willingness to engage with technical literature, and appreciation for methodological correctness make him particularly well-suited for research environments.

Dhruv is proactive, sincere, and agile in learning new concepts. He balances theoretical understanding with hands-on implementation skills, and his conduct over these three years has been exemplary. Based on his academic performance, research inclination, and professional attitude, I am confident that Dhruv would be a valuable addition to any academic or industrial research group.

I strongly recommend Mr. Dhruv Jyoti Das for a research internship position without reservation. I am confident that he will contribute meaningfully and perform to a high standard.

With regards,

Dr. Arulmurugan A

Assistant Professor,
Department of Computing Technologies,
SRM Institute of Science and Technology,
Kattankulathur, Chennai-603203
